

Program Specific Outcomes (PSOs)

ME Department

PSO-I: An ability to identify, analyze and solve engineering problems relating to mechanical systems together with allied engineering streams.

PSO-II: Apply the knowledge of Computer Aided Design and Computer Aided Engineering tools to design and analyze the products and process related to Mechanical Engineering systems especially in modern areas like 3D printing, HVAC and renewable energy.

PSO-III: An ability to build the nation, by imparting innovative technological inputs along with managerial skills to become industry ready technocrats and entrepreneurs, build the attitude of developing new concepts on emerging fields to provide solutions in a cost effective and environmentally benign manner.
